Part III DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, a storage compartment recited in claim 1 and a protruding electrical changing means recited in claim 1 must be shown or the feature(s) canceled from the claim(s). The examiner suggest showing reference number for a storage compartment and means . A proposed drawing correction or corrected drawings are required in reply to the office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance. No new matter should be entered.

Applicant is responsible for showing reference number for claimed invention.

2. Applicant is required to submit a proposed drawing correction in reply to this office action. However, formal correction of the noted defect may be deferred until after the examiner has considered the proposed drawing correction. Failure to timely submit the proposed drawing correction will result in the abandonment of the application.

Specification

3. The following guidelines illustrate the preferred layout and content for patent applications. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

The following order or arrangement is preferred in framing the specification and, except for the reference to "Microfiche Appendix" and the drawings, each of the lettered items should appear in upper case, without underlining or bold type, as section headings. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) Title of the Invention.
- (b) Cross-References to Related Applications.

Art Unit: 2831

- (c) Statement Regarding Federally Sponsored Research or Development.
- (d) Reference to a "Microfiche Appendix" (see 37 CFR 1.96).
- (e) Background of the Invention.
 - 1. Field of the Invention.
 - 2. Description of the Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) Brief Summary of the Invention.
- (g) Brief Description of the Several Views of the Drawing(s).
- (h) Detailed Description of the Invention.
- (i) Claim or Claims (commencing on a separate sheet).
- (j) Abstract of the Disclosure (commencing on a separate sheet).
- (k) Drawings.
- (l) Sequence Listing (see 37 CFR 1.821-1.825).

4. The disclosure is objected to because of the following informalities:
On page 1 lines 11, "MP3" should be spelled out completely.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 1 is rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 line 5, "one said wall " the examiner suggests change to " one of said walls " instead for improved clarity.

In claim 1 line 8, " spaced apart edges" is confusing because it is not clear that what is spaced apart edges?.

Art Unit: 2831

In claim 1 line 9, "selected size bounding openings in said cover opening" is confusing because drawings do not show the claimed features. The examiner interpreted as "selected size bounding openings in a top wall".

In claim 1 line 10, "said uniform expanse" lacks antecedent basis.

In claim 1 line 10, "said spaced apart relation" lacks antecedent basis.

In claim 1 line 12, "openings" the examiner suggests change to "said openings" instead for improved clarity.

Allowable Subject Matter

6. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph and the drawings objection, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for the indication of the allowability of claim 1 is the inclusion therein, in combination as currently claimed, of the limitation of an organizer comprising: an array of selected uniformly spaced apart edges each in a shaped configuration of a selected size bounding openings in a top wall into said storage compartment.

The previously listed limitation is neither disclosed nor taught by the prior art of record, alone or in combination.

Art Unit: 2831

Other prior art cited

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Akins, Yueh, Fox, jakubowski, and Hahn disclose a box similar to applicant's claimed invention.
